

120° HEAVY DUTY NIGHT VISION REVERSING CAMERA

Model number: **CCD11**

Thank you for purchasing this heavy duty wide angle night vision colour CCD camera which is suitable for connection to any of our LCD colour monitors. It may be used for reversing or any other desired view (front/sides/interior) This camera gives exceptional performance in low light situations due to its built-in infra-red LED night vision capability.

Included:

1 x CCD 120° camera
1 x video cable
1 x power cable
Mounting screws

- Recommended for professional installation
- Do not disassemble or attempt to repair this product
- Avoid dropping or causing impact as damage may result
- Do not use in extremes of heat and cold (see specifications)
- Avoid directing high pressure water onto the camera
- Direct sunlight, glare or rain onto the lens will affect picture quality / vision
- Do not exceed rated voltage
- Do not touch or apply pressure to the lens area

WIRING INFORMATION

Note: This camera does not have audio output.
Universal connector may be used with audio capable equipment

This camera is suitable to be mounted in almost any desired location due to its universal bracket. On large vehicles, the usual location is towards the top of the vehicle body looking back and downwards, or on the vehicles chassis if exposed. Check that the chosen location will provide sufficient rear view and adjust to avoid too much sky as the auto iris will close the lens making images dark. Do not bend the cable at the camera joint and apply silicon where the cable enters the camera to assist in preventing the entry of water and dust.

Note: Some vehicles may have computer data on the reversing light wire which may result in reduced picture quality or no picture. Check by starting the engine and engaging reverse gear. To rectify, use the reversing light voltage to control a relay (not supplied) to switch +12v to the camera.

CAUTION:
When using with a reversing camera, do not drive by watching the screen – it is only intended to show what may be behind your vehicle. Reversing camera systems are an aid to reversing to indicate what may be behind you.

Type: CCD
Viewing angle: 120°
Min' illumination: 1 lux,
0 lux with night vision
Power consumption: Approx' 85mA
Power supply: DC 12v +/- 10%
System: PAL/NTSC
Operating temperature: -10°C~+50°C
Storage temperature: -20°C~+60°C
Video connector: 'S' to RCA
