

4.3" AHD MIRROR MONITOR CLIP on and AHD Reverse Camera

Model number: **MCM43CA**

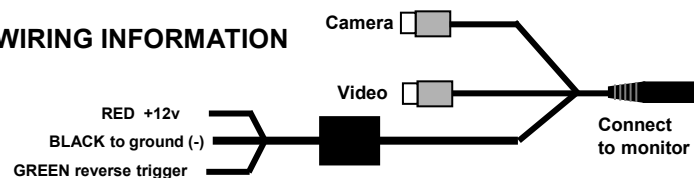

Power/Menu

Type: TFT AHD LCD
Display size: 4.3"
Screen button control
Power supply: DC 12v +/- 10%
System: PAL/NTSC AUTO
Video connector: RCA x 2

MONITOR WIRING INFORMATION

The **MCM43CA** mirror monitor is designed to clip over your existing rear view mirror. Please note that reflections, glare and sunlight may affect the monitor and mirror performance in some situations. If the original mirror has a manual tilt function, the this may assist in better viewing.

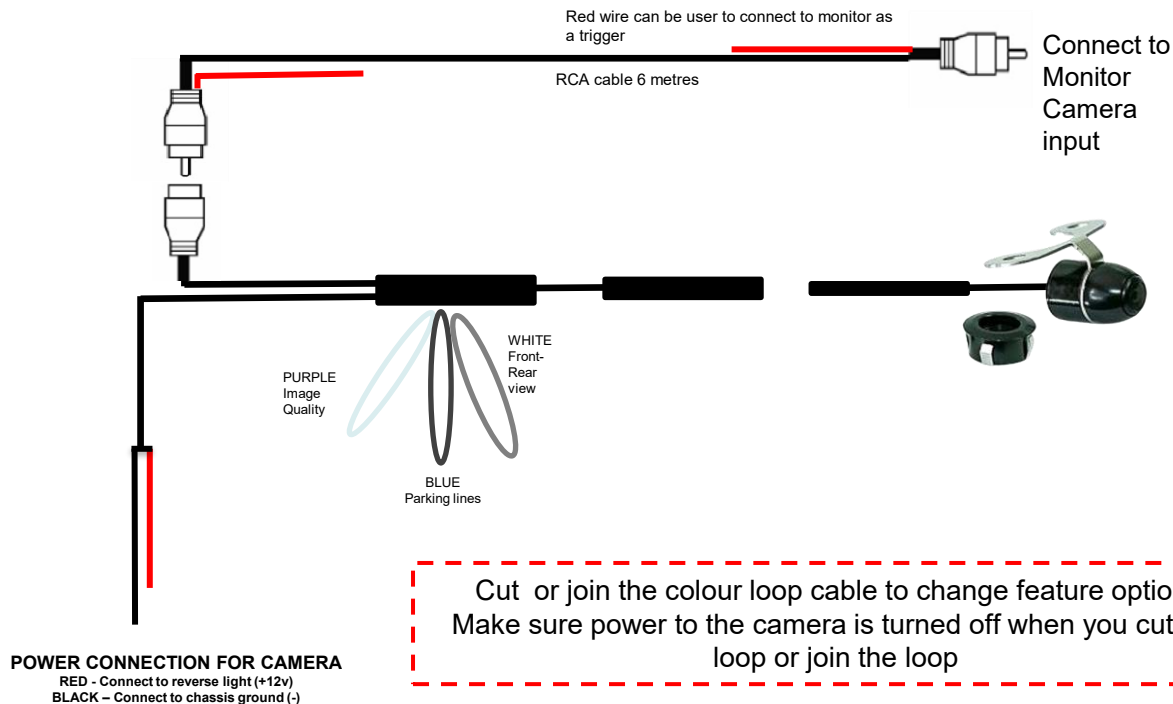

When connected to the reversing camera, the colour monitor will switch on automatically when reverse gear is selected – even if the monitors power switch is in the off position.

Adjustment:

By cycling through the 'menu button', you can change various picture controls.

This monitor has 2 video inputs. Camera is connected to the reversing camera. The other input, if connected, can be used for another camera other RCA video input.
